Auto Leasing System

We deliver results

One Key for Enhancing Operational Efficiency

With increasing demand for automobile leasing services, companies are striving to stand out and create a unique position in the market. However, with growing business comes challenges related to operations and management of customer choice, purchasing power and enhancing front-end experience for the customer.

Kanoo Consulting Services (KCS) presents the Auto Leasing System - a one-stop solution that addresses all the above requirements and expectations of your business with simplicity and ease.

What is KCS Auto Leasing System?

KCS Auto Leasing System is an award-winning* automotive leasing management software designed for large, medium and small car rental organisations, and auto-leasing companies. The software supports all kinds of car rental businesses including daily rental, short term and long term leasing, limousine, and point-to-point transport service.

Auto Leasing System offers a single integrated software solution that streamlines all activities within automotive leasing, fleet and mobility management. It's a modern, comprehensive and flexible platform developed on the Oracle E-Business Suite to best utilise the standard ERP modules along with custom-build leasing module.

* Oracle Excellence Award 2015 for Mobility Solution ("E check-in and check-out" iPad-based vehicle checklist system, to automate the vehicle check-in/ check-out process and to streamline workflows).

Customised Leasing Solution in Oracle Platform

Automating Leasing - Centralised and Cost-effective

Auto Leasing System empowers you to maximise the lifetime value of your vehicle assets, cut costs and manage your entire fleet, be it contract hire or rental operation using a single unified leasing application. At every point in the daily operations, the software handles your particular and often unique requirements in terms of work flow, functionality, data exchange and interfaces with Oracle standard modules.

Using standard E-Business Suite to cover vehicle purchase and sale, asset depreciation, invoicing, CRM and producing analysis reports, Auto Leasing System delivers a truly single integrated ERP for your auto leasing requirement.

Auto Leasing System enables you to have a centralised and cost-effective system. By providing management with real-time reports using business intelligence, the System helps ensure best-in-class features, performance and profitability.

Key features of Auto Leasing System:

Fleet Management
- Vehicle Available, Leased and Booked

Digital Reception
- Complete Paperless Process
- Mobile Apps for Check-in & Check-out
- Instant Retrieval of Contract, Agreement and Inspection Sheets

The KCS Approach: Working to Your Advantage

Empowering Leasing Through Mobility

Leasing e-Check-in & Check-out

Equipped with an iPad, your Leasing Executive can conduct a quick walk-around check and take snapshots. The App allows you to synchronise the leasing agreement, customer information and vehicle details from the Oracle EBS rental module, in real-time. All documents are scanned and any potential disputes can be avoided by accessing past records.
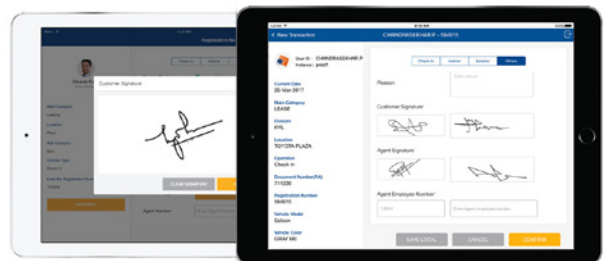

Online Documentation, Records & Check-list

The mobile application maintains an online repository of vehicles and customer information. In real-time, it retrieves rental agreements and vehicle details from the Oracle EBS rental module.

Online Customer Acceptance

The signature of the customer is captured on the tablet application as part of the sign off and acceptance. Once the user has authorised and checked-out, the data is processed back to the Oracle system to update the rental agreement. This agreement can be viewed, at any point of time, by entering the rental agreement number.

About Kanoo Consulting Services

Kanoo Consulting Services (KCS) is a division of Ebrahim K. Kanoo B.S.C (c). The KCS team consists of highly talented consultants with over 12 years of relevant experience.
